

Dany Majard

London based, French, open to relocation
d.majard@gmail.com | +44 7412 87 1818

EDUCATION

| KANSAS STATE UNIVERSITY
PHD MATHEMATICS
Grad. June 2012 | USA

| UNIVERSITÉ AIX-MARSEILLE
**MSC THEORETICAL,
MATHEMATICAL PHYSICS**
Grad. June 2006 | France

SKILLS

PROGRAMMING

Languages :

Python • Spark • SQL •
Snowflake • PostGIS • BigQuery
• Gremlin • Processing •
Assembly • Javascript • $\LaTeX$

Machine Learning :

LLM classification & critic patterns
• PyTorch • HuggingFace •
LGBM, XGBOOST, CATBOOST •
sklearn • hydra+Optuna •
PySurvival • ARIMA • Contextual
Multi-Arm Bandit

NLP:

nltk • spaCy • HuggingFace •
PyTorch

Visualization :

Explainability (PDP, SHAP, LIME) •
Geospatial (H3, deck.gl, QGIS) •
Plotting (seaborn, plotly, bokeh,
UpSet, p5.js)

Ops :

GCP • AWS • hydra • dataiku •
JanusGraph

CERTIFICATES

S2DS FELLOWSHIP

Mini-MBA boosted program for
PhDs to transition to Data Science

HOBBIES

SPORTS

| **HARDCOURT BIKE POLO**
WHBPC'16 1/4 finalist
| **ACROYOGA PRACTITIONER**

BOARD GAMES

| **DEMOING**
Stronghold publishing
| **DESIGNING**
ALP Games (own)

EXPERIENCE

LEAD ML/AI/KNOWLEDGE ENGINEER | SEPT'22 - PRESENT
CUBE | RegTech | London, UK

Lead 6 research/ML/MLOps engineers on custom ML Shape Up while staying hands-on. Only team on GCP: we own the whole stack bar networking and IAM.

- Own the ML behind global horizon scanning: per-customer content filtering over 5-10k regulatory documents/hour, supranational to county level, in production for tier-1 global banks on multi-million enterprise contracts.
- Cold-start each customer model on 200 feedback items and scale it past 100k over 3 years, tuned on both sides: suppress noise from a >4k-concept taxonomy and surface relevant documents outside the customer profile.
- Run >50 per-customer continuous training and delivery pipelines. Per-class ROC-AUC above 0.9 where feedback is dense, degrading toward chance where it is sparse – a supervision-density limit, not a modelling one.
- Shipped two LLM systems: a Financial Services classifier cutting noise for banking customers, and an LLM critic over the taxonomy classifier to suppress false positives.
- Stood up offline evaluation without online experimentation: a stratified benchmark accumulating the test set of every promoted model, plus simulation of the system's dynamic behaviour.
- Led research on ontology classification with active and efficient learning; ran a KG POC on company data across multiple graphDB vendors.
- Won CTO approval to re-organise AI/ML from a siloed function into embedded teams backed by an MLOps platform; built the skills taxonomy and matrix used to size the gap.

PRINCIPAL APPLIED SCIENTIST | SEPT'21 - MAY'22

Streetbees | Market Research | London, UK

Led the client delivery team, operated a major cultural shift towards product-centric.

- Established DevOps practices for collaboration and reproducibility.
- Shipped products from POCs for major corporations based on topic modeling and clustering - Demand Space/Need State for 22 markets & Competitive Market Analysis cementing a 3-year contract.
- Reduced delivery time by 4x and enabled the scaling of delivery capabilities.

LEAD DATA SCIENTIST | OCT'18 – AUG'21

Outra | Real Estate / Construction / Martech | London, UK

- Built geo-localized FB marketing models, reducing the CPL from £40 to £13.
- Maintained and improved (by 15%) 28 GBMs on 29M UK properties, becoming market leaders and unlocking a £200k contract.
- Built a propensity to move house model feed (£90k MRR)
- Built a segmentation and offer automation for restaurants (£100k ARR)

HEAD OF SALES - CUSTOMER RELATIONS | Nov'14 – DEC'16

Festka | Cycling Manufacturing | Prague, CZ

- Built a 24-partner global distribution network and a direct-to-customer funnel: 5x sales, 30% faster delivery, >98% satisfaction.

POST-DOCTORATE FELLOW | SEPT'12 – OCT'14

Masaryk University | Prague, Czech Republic

- Advanced own research program on higher cubical categories and groups.
- Developed a course on graphical calculus and monoidal categories.

PROJECTS

ETHICS // LAW | JAN'19- JAN'20

Working group | College des Bernardins

- AI expert on the impact of autonomous systems on the State of Law; report commissioned by the Ministry of Justice.
